The Federal Government of Somalia -FGS, through the Somalia National Bureau of Statistics -SNBS, has received financing from the World Bank toward the implementation of Somali Integrated Statistics and Economic Capacity Building -SISECB Project. The project aims at strengthening the country's national statistics system, the monitoring and evaluation -M&E system, and improving programming and analytical capacity of the government's macroeconomics and fiscal programming agencies to enable them to regularly assess, analyze and improve their public policies and programs performance and results. Specifically, the project aims at: (1) Strengthening the national statistics system; (2) Strengthening monitoring and evaluation capacity; and (3) Building economic policy analysis and economic planning capacity.

Currently, post-disaster needs assessments in Somalia are conducted on a fragmented basis, often driven by humanitarian imperatives and external partners, with limited linkage to national budgetary processes and medium-term development planning. The absence of a nationally endorsed Rapid-Post Disaster Needs Assessment (RPDNA) framework has resulted in inconsistencies in assessment methodologies, delays in recovery planning, and challenges in mobilizing and coordinating financing. The development of an RPDNA Implementation and Financing Framework under SISEPCBP will address these challenges by institutionalizing a harmonized approach that aligns international good practice with Somalia's federal governance structure, institutional capacity, and data environment.
